

## REMARKS

Per Examiner 35.U.S.C.103a rejection of claims 21 and 24 in view of Alexander (US.6177931) and Ballantyne (US.5867821); claims 22 and 25 over Alexander, Ballantyne and Peifer (US.5987519); and claims 23 and 276 over Alexander, Ballantyne and Hill (US.5857155), Applicants amend both independent claims to clarify patentably that the sensor comprises "personal biological" sensor (support appears in Specification page 6 lines 15-18, and page 14 lines 7-19.)

Since cited references (e.g., Alexander, Ballantyne) individually or in any combination neither teach nor suggest Applicants' invention subject matter claimed as a whole, Applicants respectfully submit that claims are allowable.

Respectfully submitted,

Dennis S. Fernandez
